

**HAZARD COMMUNICATION PROGRAM
CONTRACTOR REQUIREMENTS
December 2017**

Requirements

- (1) Have an established Hazard Communication Program according to the standards listed below and complete all work in accordance with this standard.
- (2) Provide a copy of their Hazard Communication Program to the UNLV project manager/point of contact, if requested.
- (3) Coordinate with the UNLV project manager/point of contact to receive the following information:
 - a) Copies of Safety Data Sheets (SDS) for chemicals at UNLV for which contractor employees may be exposed.
 - b) Labeling system used in the location where contractor employees will be working.
 - c) Precautionary measures to protect employees during normal operating conditions.
 - d) Explanation of the alarm methods and notification procedures in the event of an emergency.
- (4) Provide the UNLV project manager/point of contact copies of SDS for all chemicals the contractor will use and/or store on campus, if requested.
- (5) Ensure that all containers brought on campus are labeled in accordance with Hazard Communication Program requirements and can be secured to prevent leakage.
- (6) Ensure if chemical spills occur, they are handled properly and used product containers are properly disposed.
- (7) Provide appropriate protective equipment to their employees for the chemicals being used/hazards encountered and ensure it is used when required.
